Dear Gaylord Industries Hiring Team,

I'm a Portland-area HR professional with a background in employee programs, organizational development, and cross-functional coordination—and I'm excited about the opportunity to contribute to Gaylord Industries' team in Tualatin as an HR Generalist.

In my current role, I've built documentation and onboarding processes for 70+ staff, coordinated programs for 600+ participants, and used data from employee listening sessions to continuously improve the employee experience. At Vestas Wind Systems, I supported the HRBP team directly on employee relations cases, onboarding redesign across three global locations, and a strategic Inclusive Leadership initiative that scaled from 12 senior leaders to 23 global sites. At Kronos Research, I drafted job descriptions, managed ATS records, and coordinated full-cycle recruiting—giving me hands-on experience across the recruitment lifecycle.

I'm also experienced in HR compliance and records management through my HRCI coursework, and I'm familiar with Workday as an HRIS platform. The breadth of this role—recruiting, benefits, FMLA/ADA administration, safety program coordination, timekeeping, and employee engagement—aligns well with the generalist experience I've been building, and I'm genuinely energized by the opportunity to serve as a true HR business partner to a production plant team.

I would love to bring this experience and my commitment to people-first HR to Gaylord Industries.
