Dear Lyra Health Hiring Team,

Training operations isn't just about **scheduling sessions and sending invites**—from my experience, it's about creating a continuous cycle of collecting insights, analyzing data, and refining solutions that **make every training experience frictionless and ready to scale**. With a background in **HR, Organizational Development, and Program Management**, I have helped organizations design and implement data-informed strategies that strengthen both organizational growth and **how people learn and develop**. I look forward to bringing a balanced blend of analytical and interpersonal strengths—using **training facilitation and logistics, training-content design and workflow optimization, and data-driven program measurement**—to Lyra Health as a **Training Operations Associate II**.

As an HR Business Partner Assistant at **Vestas Wind Systems**, I enhanced operational efficiency by **identifying process gaps, streamlining workflows, and partnering with cross-functional stakeholders**. Through stakeholder interviews, I clarified ambiguous job responsibilities and **optimized onboarding processes across 3 global locations**, improving both efficiency and the people experience. Overseeing the integration of an acquired company during an **M&A project** further demonstrated my ability to manage organizational change and keep cross-functional teams aligned.

At **NextGen Healthcare**, I deepened my **strategic planning, data analysis, and advisory skills**. I initiated a manager-effectiveness project that transformed employee feedback into actionable insights, and **analyzed 2,000+ employee experiences** to surface what actually drives satisfaction. My initiative and **data-driven recommendations** enabled the C-suite to prioritize essential organizational needs and develop targeted **L&D** strategies.

In my current role as a **Program Enablement Manager** at **InGenius Prep**, I lead cross-functional collaboration across partners, vendors, and internal teams—**managing 20+ programs and 10+ vendors, building training content and workflows for 70+ staff that cut onboarding time by 75%, and facilitating live training sessions for 600+ participants**—owning agendas, invites, and attendance—to a **78% program enrollment rate**. I run needs assessments with **25+ global stakeholders**, translating ambiguous asks into structured programs, and apply continuous feedback loops to identify workflow gaps and refine program positioning, delivery strategy, and operations.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which shaped how I think about people problems as systems: I **diagnose with data, collaborate cross-functionally on solutions, and track metrics to ensure real progress**. As an **analytical organizer with a growth mindset**, **Lyra Health's** mission to transform access to mental health care—and to enable its clinicians through learning and development at scale—draws me in. I'd love to bring this methodology to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
