Hiring Manager

Roivant Sciences

New York, NY

People operations isn't just about maintaining accurate records—from my experience, it's about building the operational trust that lets a company move fast: lifecycle changes that land without errors, onboarding that makes day one feel intentional, and a system backbone employees can actually rely on. That intersection of precision and care is exactly what draws me to Roivant Sciences as a People Operations Associate.

At InGenius Prep, I built documentation and process infrastructure for 70+ cross-functional staff—guides, workflows, and onboarding materials that reduced ramp-up time by 75%. Maintaining data accuracy across platforms while managing 20+ programs simultaneously gave me the operational discipline this role demands. At Vestas Wind Systems, I supported the HRBP team on employee relations cases, streamlined onboarding across 3 global locations, and assisted with an M&A integration—exactly the kind of cross-entity coordination a holding company like Roivant navigates routinely.

My MS in Applied Organizational Psychology from USC (3.95 GPA) sharpened my instinct for when a process is silently breaking and how to fix it before it surfaces in compliance gaps or frustrated employees. Three years in People Operations roles means I meet Roivant's 2+ year bar with room to grow into the complexity you're building toward. I'm currently based in Portland and fully committed to the NYC hybrid schedule—I'm excited about the move. Thank you for considering my application; I'd love to discuss how I can help Roivant's People team scale with confidence.

Sincerely,

Jamie (Yi-Chieh) Cheng
