Dear Affirm Hiring Team,

A great knowledge experience isn't just about keeping articles updated—from my experience, it's about building a living system where insights are collected, structured, and continuously refined through cross-functional collaboration so people can actually help themselves. With a background spanning program operations, knowledge documentation, and organizational development, I'm excited to bring that systems mindset to Affirm as your People Knowledge Experience Manager.

At **InGenius Prep**, I built exactly this kind of infrastructure—establishing **cross-functional processes and documentation for 70+ staff** that reduced onboarding time by 75%, and managing **end-to-end lifecycles for 20+ projects** while maintaining the knowledge resources teams relied on. I learned that good knowledge architecture isn't a static repository; it's a governed, evolving system that has to anticipate how people actually search, ask, and self-serve. I also lean on **AI tools** daily to draft, organize, and tighten that documentation faster.

At **NextGen Healthcare**, I **analyzed 2,000+ employee experiences** and translated them into reports that guided C-suite decisions—reinforcing my conviction that you measure a support system by whether it actually resolves what people need, not by how much content it holds. And at **Vestas Wind Systems**, I **optimized onboarding processes across 3 global locations** by mapping where information broke down and clarifying responsibilities, the same diagnostic instinct a centralized knowledge ecosystem demands.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which trained me to treat people challenges as systems: I diagnose with data where employees get stuck, collaborate cross-functionally on the fix, and track quality metrics to make sure the system keeps improving. As an **analytical organizer with a growth mindset**, Affirm's mission to make credit honest and friendly and the chance to build an AI-ready knowledge experience for your People team are both genuine draws. I'd love to bring this methodology to Affirm.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
