Dear Affirm Hiring Team,

A great workplace isn't just about keeping the lights on and the snacks stocked—from my experience, it's about building programs and operations, grounded in real utilization data and stakeholder input, that make people genuinely want to come together and do their best work. With a background spanning program operations, vendor coordination, and organizational development, I'm excited to bring that combination of operational rigor and people focus to Affirm as your Workplace Manager.

At **InGenius Prep**, I run the operations side of the house: I **manage end-to-end lifecycles for 20+ programs and coordinate 10+ vendors**, refining positioning, delivery, and day-to-day operations through feedback analysis. I built **cross-functional processes and documentation for 70+ staff** that cut onboarding time by 75%. That work taught me how to juggle multiple sites, vendors, and budgets while keeping a consistent, high-quality experience—exactly the muscle a multi-site workplace function relies on.

At **Vestas Wind Systems**, I **optimized onboarding processes across 3 global locations** and **streamlined relocation logistics** by coordinating closely with cross-functional teams—learning firsthand how the physical and operational experience shapes whether people feel set up to succeed. I also strengthened engagement through well-being initiatives recognized among 1,000+ competitors.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which trained me to treat the workplace as a system: I diagnose with data where the experience or operations break down, collaborate cross-functionally on solutions, and track metrics—utilization, satisfaction, cost efficiency—to make sure the program keeps improving. As an **analytical organizer with a growth mindset**, Affirm's mission to make credit honest and friendly and the chance to lead a distributed workplace team in a remote-first company are both genuine draws. I'd love to bring this methodology to your Places & Experiences team.

Sincerely,

Jamie Cheng
