Dear Decagon Hiring Team,

Building a world-class team isn't just about filling roles—from my experience, it's about delivering an exceptional candidate experience and running recruiting operations sharp enough that great people choose to say yes. With a background spanning recruiting, program operations, and organizational development, I'm excited to bring that mix of operational precision and genuine people investment to Decagon as a Talent Associate.

At **InGenius Prep**, I coordinate the **logistics and end-to-end lifecycle of 20+ programs**, where the day-to-day looks a lot like recruiting coordination: scheduling with precision, keeping stakeholders aligned, and **streamlining workflows** so nothing slips. I built documentation for 70+ cross-functional staff that reduced onboarding time by 75%, and I'm the person teammates come to when a process needs to be both fast and reliable. I genuinely enjoy taking ownership of the small details that add up to a white-glove experience.

Earlier, at **Kronos Research**, I worked the **top of the recruiting funnel directly**—drafting job descriptions, posting openings, and engaging global talent through personalized outreach that **increased applications by 566% in two months**. I also organized campus recruiting events and moderated executive panels at top universities, reaching 230+ students. That role taught me what it feels like to hunt for exceptional talent and to make every candidate touchpoint feel considered and warm.

At **Vestas Wind Systems**, I supported the HRBP team on people initiatives across employee relations, headcount, and onboarding, and helped pilot an Inclusive Leadership workshop later scaled to 23 global locations. Working across a fast-moving, international organization taught me to navigate ambiguity and build structure where there wasn't any yet.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**—which trained me to treat people challenges as systems: I diagnose with data, collaborate cross-functionally on solutions, and track metrics to make sure they actually work. As an **analytical organizer with a growth mindset**, Decagon's velocity, polymath culture, and the chance to help build a Gen-AI-native Talent function are real draws. I'd love to bring this energy to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
