Dear Faire Hiring Team,

People analytics isn't just about pulling headcount reports—from my experience, it's about structuring data so the People team can actually trust it, ask better questions of it, and act on it through cross-functional collaboration. With a background spanning employee-experience analysis, HR data governance, and program operations, I'm excited to bring that analytical mindset to Faire as your People Analytics & AI Specialist.

At **NextGen Healthcare**, I **analyzed 2,000+ employee experiences** and turned them into reports that directly guided C-suite decisions on satisfaction and engagement drivers—learning how to make people data legible and decision-grade for non-technical stakeholders. At **ODN Oregon**, I went a step further on data ownership: I **upskilled an HR team to audit 300+ leave cases** and **quantify \$362K in leave costs**, using rigorous analysis to refute assumptions and drive policy redesigns. That's the heart of this role—definitions, governance, and self-service that hold up under scrutiny.

At **InGenius Prep**, I sit at the intersection of operations and data, managing **end-to-end lifecycles for 20+ projects** through feedback loops, and I lean on **AI tools daily**—I've even trained 600+ people on adopting new tools and products. I'm fluent translating between the people side and the technical side, which is exactly what an AI roadmap built on People-and-IT collaboration requires. I'm comfortable in the data layer too, from survey design to dashboards to the kind of structured problem-solving SQL and HRIS work demand.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which trained me to treat people questions as systems: I diagnose with data, collaborate cross-functionally on solutions, and track metrics to ensure they hold. As an **analytical organizer with a growth mindset**, Faire's mission to level the playing field for independent retailers and the chance to build the data foundation for AI-augmented People tools are both genuine draws. I'd love to bring this methodology to your People team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
