Dear Figma Hiring Team,

Enablement isn't just about running a training—from my experience, it's about a continuous cycle of reading what a stakeholder's data and goals are telling you, designing the plan that meets them where they are, and refining it through collaboration until adoption genuinely takes hold. With a background in program enablement, training delivery, and stakeholder strategy, I'm excited to bring that to Figma's Customer Success and Enablement organization.

At **InGenius Prep**, I design **enablement plans and documentation across 20+ programs**, building guides that drove product understanding and reduced onboarding time by 75%. I deliver **customized live training sessions and webinars for 600+ participants** to drive adoption and a 78% program enrollment rate, run needs assessments with 25 global stakeholders to inform engagement tactics, and build relationships across Marketing, Tech, and Sales teams—analyzing metrics and feedback to identify champions and expansion opportunities. Tailoring enablement to a portfolio's maturity is exactly what I do.

At **NextGen Healthcare**, I led a **manager effectiveness initiative** that translated 2,000+ experiences into reports guiding C-suite decisions, and elevated experience through five cross-functional projects spanning survey design, recognition, and L&D—reinforcing that I diagnose with data before designing the intervention.

At **Vestas Wind Systems**, I **optimized onboarding processes across three global locations** by analyzing where the experience broke down and clarifying responsibilities, building trust with leaders along the way.

This is how I approach work—uniquely grounded in my **MS in Applied Organizational Psychology (USC)**: I diagnose with data to find where users struggle, collaborate cross-functionally on solutions, and track key metrics to ensure adoption holds. As an **analytical organizer with a growth mindset**, Figma's mission to make design accessible to all—and the chance to help customers get real, lasting value from the platform—are both genuine draws. I'd love to bring this methodology to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
