Dear Figma Hiring Team,

Onboarding isn't just about walking someone through setup—from my experience, it's about a continuous cycle of understanding what each stakeholder is actually trying to achieve, designing the path that gets them there, and refining it through feedback until value is real and adoption sticks. With a background in program management, training delivery, and needs-driven design, I'm excited to bring that to Figma's Customer Experience team.

At **InGenius Prep**, I manage **onboarding and end-to-end delivery for 20+ programs**, creating training materials and guides that reduced onboarding time by 75%. I deliver **customized live training sessions and webinars for 600+ participants**, conduct **needs assessments with 25 global stakeholders** to align objectives, and serve as a trusted advisor across Marketing, Tech, and Sales teams—tracking metrics and synthesizing feedback to shape new initiatives. Managing many concurrent stakeholders toward their own milestones is the heart of my role.

At **Vestas Wind Systems**, I **optimized onboarding processes across three global locations** by analyzing where the experience broke down and clarifying responsibilities—early proof that I think about onboarding as a system to be measured and improved, not a checklist.

At **NextGen Healthcare**, I led a **manager effectiveness initiative** that translated 2,000+ experiences into reports that guided C-suite decisions—reinforcing my instinct to diagnose with data before recommending a path forward.

This is how I approach work—uniquely grounded in my **MS in Applied Organizational Psychology (USC)**: I diagnose with data to understand where people struggle, collaborate cross-functionally on solutions, and track key metrics to ensure adoption holds. As an **analytical organizer with a growth mindset**, Figma's mission to make design accessible to all—and the chance to set customers up to realize that value from day one—are both genuine draws. I'd love to bring this methodology to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
