Dear Palantir Hiring Team,

People Operations isn't just about processing transactions—from my experience, it's about removing friction from the employee journey through thoughtful process design, reliable data, and cross-functional partnership, so every Palantirian's experience feels seamless from offer onward. With a background spanning people operations, program management, and organizational development, I'm excited to bring that detail-oriented, problem-solving approach to Palantir as a People Operations Specialist.

At **InGenius Prep**, I **identify opportunities to streamline workflows and build the SOPs** that make operations repeatable—work that reduced onboarding time by 75% for 70+ staff. I manage programs across functions, from **vendor management to building new workflows** for emerging needs, and I triage inbound inquiries with a commitment to accuracy and a smooth experience. Juggling high-volume, competing priorities without dropping the details is exactly where I'm at my best.

At **Vestas Wind Systems**, I ensured a smooth **employee experience from offer onward**, optimizing onboarding across 3 global locations, and directed a **Mergers & Acquisitions project** that partnered on HRIS processes to migrate and merge records accurately. I also streamlined internal transfers, immigration, and relocation with cross-functional teams and attorneys—the kind of behind-the-scenes operational work that quietly makes everything else possible.

At **NextGen Healthcare**, I **leveraged people data**, analyzing 2,000+ employee experiences to answer business questions and guide C-suite decisions—reinforcing my habit of diving into the data when the business has a question.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**: I diagnose with data, collaborate cross-functionally on solutions, and track metrics to ensure real progress. As an **analytical organizer with a growth mindset** who finds people-focused operational work genuinely rewarding, Palantir's mission to empower the world's most important institutions—and a People Ops team that's a critical gateway to the employee experience—are real draws. I'd love to help make that happen.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
