Dear Robinhood Hiring Team,

Learning design isn't just about building a course—from my experience, it's about a continuous cycle of diagnosing where capability gaps live, designing programs and standards that scale, and refining them with evaluation data until the learning actually changes behavior. With a background in program management, instructional design, and evidence-based development, I'm excited to bring that to Robinhood's Learning & Development team.

At **InGenius Prep**, I **design end-to-end learning programs across onboarding and skill-building for 20+ initiatives**, establishing scalable standards and templates. I develop guides and learning materials—increasingly with **AI tools**—and run content audits that reduced onboarding time by 75%, manage intake and scope alignment with business partners, and use needs assessments and **evaluation frameworks** with 25 global stakeholders to design new programs. Building design standards and running quality audits at scale is the center of my day-to-day.

At **NextGen Healthcare**, I led a **manager effectiveness initiative** that translated 2,000+ responses into reports shaping L&D strategy, building the kind of training-evaluation discipline that measures whether programs are working—not just whether they shipped.

At **Vestas Wind Systems**, I **piloted an Inclusive Leadership workshop for 12 senior leaders that scaled to 23 global locations** and supported learning through an M&A integration—early evidence that I can design leadership-development experiences that travel across a global, changing org.

This is how I approach work—uniquely grounded in my **MS in Applied Organizational Psychology (USC)**: I diagnose with data to find capability gaps, collaborate with stakeholders to design solutions, and track evaluation metrics to ensure learning holds. As an **analytical organizer with a growth mindset**, Robinhood's mission to democratize finance for all—and the chance to build a scalable, high-quality learning function—are both genuine draws. I'd love to bring this methodology to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
