Dear Stanford University Hiring Team,

Great training isn't just about delivering content—from my experience, it's a continuous cycle of assessing what learners actually need, designing evidence-based solutions, and refining them through cross-functional collaboration and data. With a background spanning program enablement, organizational development, and a master's in Applied Organizational Psychology, I'm genuinely excited to bring that learning-design mindset to the Department of Medicine Clinical Research Hub as your Education and Training Lead.

At **InGenius Prep**, learning design is the core of my work. I run **needs assessments with 25+ global stakeholders** to pinpoint capability gaps, then translate those findings into new educational programs—building **course guides, workflows, and performance-support materials** for 70+ cross-functional staff that cut onboarding time by 75%. I've also stood up a **new training program end to end**, hosting live sessions and producing instructional videos that reached 500+ participants, and I facilitate webinars for 600+ learners while tracking a 78% enrollment rate. Designing for adult learners, defining outcomes, and iterating on what works is already my day-to-day.

At **NextGen Healthcare**, I delivered internal **training on DEI, Inclusive Leadership, and performance review**, and led a manager-effectiveness initiative that turned 2,000+ employee responses into reports that shaped engagement strategy. At **Vestas Wind Systems**, I launched an **Inclusive Leadership workshop** for 12 senior leaders that scaled to 23 global locations—an early, hands-on lesson in the train-the-trainer and faculty-development work this role calls for.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)** and my undergraduate background in Education Studies: I treat learning challenges as systems. I diagnose with data to understand where people struggle, collaborate cross-functionally on solutions, and track metrics to ensure the learning actually sticks. As an **analytical organizer with a growth mindset**, I'm drawn to Stanford's mission-driven research environment and the chance to build training that helps research professionals do their best work. I'd be honored to bring this methodology to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
