Dear Lovable Hiring Team,

Recruiting operations aren't just about keeping the calendar full—from my experience, it's about treating ATS hygiene and data as the foundation a hiring team trusts, then using clear communication to give every candidate an exceptional experience. With a background spanning program operations, HR, and organizational development, I'm excited to bring that careful, systems-minded approach to Lovable as a Recruitment Coordinator.

At **InGenius Prep**, I keep the operational engine running: I **coordinate and oversee scheduling and logistics for 20+ programs** across Marketing, Tech, and Sales teams, keeping multiple workstreams on track at pace, and I **maintain ATS (Greenhouse) hygiene and data accuracy** to extract actionable insights. I'm also genuinely interested in applying AI to make recruiting smarter—I use AI tools daily and have even been building a RAG-based system on the side—so the chance to bring that curiosity to your ops would be a natural fit. I've used Greenhouse extensively and pick up new ATS platforms quickly, so Ashby would come fast.

At **Vestas Wind Systems**, I learned to coordinate complex schedules across time zones while partnering with senior leaders, all while handling confidential information with discretion and care. Earlier, at **Kronos Research**, I delivered a **best-in-class candidate experience** through personalized, warm communication—work that helped increase applications by 566% in two months. Clear writing and genuine care at every stage of the process is something I really do enjoy.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which trained me to treat operations as a system: I diagnose with data where a process breaks down, collaborate cross-functionally on the fix, and track results to make sure they hold. As an **analytical organizer with a growth mindset**, Lovable's mission to let anyone build software—and the chance to keep your recruiting engine running flawlessly as you scale—are both genuine draws. I'd love to bring this approach to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
