Dear Samsara Hiring Team,

Effective enablement isn't just about delivering training—from my experience, it's about diagnosing the real performance gap, building curriculum that closes it, and managing the change so the new way of working actually sticks. With a background in L&D, change management, and program enablement, I'm excited to bring that systematic approach to Samsara as an Enablement Business Partner for Customer Success.

At **InGenius Prep**, I run enablement end-to-end across **20+ programs**, partnering with Marketing, Tech, and Sales teams to close performance gaps. I **deliver training to 600+ participants**, **build curriculum** across live and async formats, and own the documentation that cut onboarding time by 75%. The lesson that shaped me: when a rollout I led wasn't adopted, I went back, diagnosed that the gap was friction not resistance, and built a targeted intervention. Enablement only works when it meets people where they actually struggle.

Change management is where I'm especially strong. At **Vestas Wind Systems**, I led an Inclusive Leadership initiative using **ADKAR**—I built awareness, found internal champions, partnered with a subject-matter expert to develop the curriculum, and ran reinforcement workshops to sustain adoption. It **scaled from a pilot to 23 global locations** in a fast-moving, change-heavy environment. I'll be candid: I haven't held a post-sale CSM or Account Manager title. But the heart of this role—diagnosing CS performance gaps, designing curriculum, delivering training, and driving change—is exactly what I do.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which trained me to treat enablement as a system: I diagnose with data, collaborate cross-functionally on the intervention, and track behavioral signals to make sure it holds. As an **analytical organizer with a growth mindset**, the chance to help Samsara's CS team perform at its best as the company scales is a genuine draw. I'd love to bring this methodology to your Enablement team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
