Dear Hiring Team,

When I read that this role sits with SMEs and your Leadership Development team to design, develop, and deliver training, I recognized the work I do every day. At **InGenius Prep**, I design and deliver training webinars for **600+ participants**, sustaining a **78% program enrollment rate**, and I build the guides, workflows, and content that onboard **70+ staff**—work that cut onboarding time by **75%**. Pairing program craft with how adults actually learn is exactly what draws me to this Learning and Talent Development Specialist position at **RxBenefits**.

My instinct for learning design is grounded in formal training, not guesswork. My **MS in Applied Organizational Psychology** from USC (coursework in Group Dynamics & Leadership, Research Methods) and my **BA in Psychology and Education Studies** from Wesleyan (Educational Psychology, Learning and Motivation) give me a working foundation in adult learning theory that I apply when I diagnose gaps and choose a format. At InGenius I run **needs assessments with 25+ stakeholders** to surface real learning gaps and design **3 new programs** from them—starting with the learner and the evidence, then building the curriculum.

I am honest that my title history is earlier-career than a five-year ask, but the depth is real and it spans talent development specifically. As a **Consultant, Organization & Talent Development** with the ODN network, I upskilled an HR team to audit **300+ leave cases** and turned **\$362K** in leave-cost findings into executive-ready insights that reshaped policy and first-aid training. As an OD intern at **NextGen Healthcare**, I analyzed **2,000+ employee experiences** for the C-suite and ran one of five cross-functional projects focused on L&D. I juggle **20+ simultaneous programs and 10+ vendors** with minimal supervision, and I build my own materials in MS Office, Canva, and Adobe InDesign.

Trained as an organizational psychologist, I treat every program as a hypothesis: assess the need, design the intervention, deliver it, and measure whether people actually grew—then iterate. I would be glad to bring that disciplined, human-centered approach to the learning experiences your teams rely on at RxBenefits.

Warmly,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
