Dear Stripe Hiring Team,

People Operations isn't just about keeping processes running—from my experience, it's about building the infrastructure that lets teams trust their systems: a continuous cycle of analyzing demand data, identifying gaps, and refining operations through cross-functional collaboration. With a background spanning operational program management, global onboarding optimization, and evidence-based people strategy, I'm excited to bring that same discipline to Stripe as a Program Manager, People Operations Strategy.

At **Vestas Wind Systems**, I worked directly alongside the HRBP team on a Mergers & Acquisitions project, coordinating **cross-functional stakeholders** across multiple geographies to ensure smooth organizational change—a direct analog to the kind of intake orchestration and stakeholder deployment Stripe is building. I also streamlined **onboarding processes across 3 global locations** by conducting gap analyses and clarifying role responsibilities, demonstrating that operational improvements require both diagnostic rigor and relationship-driven execution.

At **InGenius Prep**, I managed **20+ programs and 10+ vendor relationships** simultaneously, building the prioritization frameworks, feedback loops, and documentation that kept operations coherent at scale. I developed **cross-functional processes for 70+ staff** that reduced onboarding time by 75%, and facilitated **training webinars for 600+ participants**, achieving a 78% client conversion rate. Running needs assessments with 25+ global stakeholders to redesign programs from the ground up gave me hands-on experience turning data signals into structural improvements—the same shift from reactive to proactive that Stripe is pursuing.

At **NextGen Healthcare**, I led a **manager effectiveness initiative**, transforming feedback data into actionable executive reports that directly shaped engagement strategy. Analyzing 2,000+ employee experience data points to guide C-suite decisions reinforced my belief that the most durable People Operations improvements come from rigorous diagnosis first, then collaborative solution design.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**—which trained me to treat operational challenges as systems: I diagnose with data, collaborate cross-functionally on solutions, and continue tracking metrics to ensure real progress. As an **analytical organizer with a growth mindset**, Stripe's mission to grow the GDP of the internet—and the challenge of building People Operations infrastructure that scales with that ambition—is a genuine draw. I'd be excited to bring this methodology to your team.

Sincerely,

Jamie Cheng

Jamie (Yi-Chieh) Cheng
