Dear Axon Hiring Team,

**Employee experience** isn't just about logistics—from my experience, it's about building onboarding and people programs driven by data, continuous analysis, and cross-functional collaboration, so every new hire feels set up for success from day one. With a background spanning global onboarding optimization, vendor and program coordination, and employee engagement analysis, I'm excited to bring that same combination of operational rigor and people-first mindset to Axon as an Employee Experience Program Manager.

At **Vestas Wind Systems**, I owned the end-to-end optimization of **onboarding processes across 3 global locations**—conducting gap analyses, clarifying role responsibilities, and partnering with cross-functional stakeholders to make the new-hire experience consistent and scalable. Alongside that, I designed an award-winning well-being communications initiative recognized among 1,000+ competitors, and helped pilot an **Inclusive Leadership workshop** that was later scaled to 23 global sites. That work taught me that great employee experience requires both operational infrastructure and genuine investment in culture.

At **InGenius Prep**, I managed **20+ programs and 10+ vendor partnerships** simultaneously—coordinating delivery strategy, refining program positioning, and running needs assessments with 25+ global stakeholders to continuously improve what we offered. I built **onboarding documentation and workflows for 70+ cross-functional staff** that reduced ramp-up time by 75%, and facilitated **training webinars for 600+ participants**, achieving a 78% program enrollment rate. Managing a high-volume L&D inbox, triaging requests across programs and vendors, and keeping every stakeholder informed was the connective tissue of that role—skills that map directly to Axon's NHO ownership and L&D inbox management.

At **NextGen Healthcare**, I analyzed **2,000+ employee experience data points** to surface insights for C-suite on satisfaction drivers, and elevated employee experience through 5 cross-functional projects spanning survey development, rewards & recognition, and L&D programming. Translating raw feedback into clear, actionable direction for leadership gave me a clear appreciation for the diagnostic side of EX work—not just running programs, but constantly asking whether they're working.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**—which shaped how I think about people problems as systems: I diagnose with data, collaborate cross-functionally on solutions, and track metrics to ensure real progress. As an **analytical organizer with a growth mindset**, Axon's mission to protect life and the opportunity to build an onboarding program that gives new hires the foundation to do that meaningful work—both draw me in. I'd love to bring this methodology to your team.

Sincerely,

*Jamie Cheng*
