Dear Hiring Team,

I believe people programs work best when they're run like programs—with clear mechanisms, real data behind every decision, and stakeholders who feel heard at each step. That belief is exactly why the HR Specialist, PXT Programs role on the One Medical PXT team caught my eye: standing up PMO mechanisms, sharpening HR policy alongside Legal and HRBPs, and keeping complex, multi-dependency work moving is the kind of program craft I genuinely enjoy.

At InGenius Prep, I currently manage 20+ programs and 10+ vendors, continually refining positioning, delivery strategy, and operations through structured feedback analysis. I run needs assessments with 25+ global stakeholders to surface gaps and design new programs, and I've built guides and workflows for 70+ cross-functional staff that cut onboarding time by 75%. Coordinating that many moving pieces across people, partners, and timelines is the closest thing I have to a daily PMO, and it's taught me how to make consistency feel like support rather than overhead.

I also like to let the data lead. At NextGen Healthcare, I analyzed 2,000+ employee experiences to amplify employee voice and guide C-suite decisions on what actually drives satisfaction, and turned manager-effectiveness feedback into reports leaders could act on. More recently, through ODN Oregon, I've upskilled an HR team to audit 300+ leave cases and present executive-ready insights on \$362K in leave costs—work that directly informed policy redesign. That blend of analysis and policy is close to what this role asks for.

I approach people work the way I'd approach any experiment: form a clear hypothesis, gather the evidence, test it with the people closest to the problem, and let the results shape what comes next. I'd love to bring that scientific, human-centered approach to the programs and policies that help One Medical keep growing within Amazon.

Warmly,

Jamie Cheng
