Dear Reed College Hiring Team,

Student and alumni development isn't just about pointing people toward resources—from my experience, it's about creating a continuous cycle of collecting insights, analyzing data, and refining solutions that genuinely move people forward through transitions. With a background in **HR, Organizational Development, and Program Management**, I have helped organizations design and implement data-informed strategies that strengthen both organizational growth and the people experience of those they serve. I look forward to bringing a balanced blend of analytical and interpersonal strengths—using **holistic program design, qualitative and quantitative data storytelling, and cross-functional stakeholder collaboration**—to Reed College as an **Assistant Director, Advising**.

As an HR Business Partner Assistant at **Vestas Wind Systems**, I initiated a DEI pilot with an **Inclusive Leadership workshop for 12 senior leaders**, later expanded to 23 global locations—my most direct experience **building inclusive-leadership and equity-aware practice** into professional development, and the foundation I'd draw on to advance Reed's anti-racist goals. I also **optimized onboarding processes across 3 global locations** through stakeholder interviews and workflow analysis.

At **NextGen Healthcare**, I deepened my **strategic planning, data analysis, and advisory skills**. I provided direct consultations on **DEI, Inclusive Leadership, and performance review strategy** and **analyzed 2,000+ employee experiences** to surface what actually drives satisfaction. My **data-driven recommendations** enabled the C-suite to prioritize organizational needs and develop targeted people strategies—the kind of qual-plus-quant storytelling the CLBR model values.

In my current role as a **Program Enablement Manager** at **InGenius Prep**, I lead cross-functional collaboration across partners, vendors, and internal teams—**conducting needs assessments with 25+ global stakeholders to design 3 new educational programs, building guides and workflows for 70+ staff that cut onboarding time by 75%, and facilitating training webinars for 600+ participants to a 78% program enrollment rate**. My BA in Psychology and Education Studies from Wesleyan (coursework: Educational Psychology, Practicum in Education Studies, Learning and Motivation) grounds this program design work in a genuine understanding of how people learn and develop. I'll be candid: my experience here has been adjacent—designing programs, coaching, and using data to surface what people need next—rather than formal 1:1 career advising. The CLBR's openness to tangential backgrounds is the honest bridge.

My approach is grounded in my **MS in Applied Organizational Psychology (USC)**, which shaped how I think about people problems as systems: I **diagnose with data, collaborate cross-functionally on solutions, and track metrics to ensure real progress**. As an **analytical organizer with a growth mindset**, **Reed College's** mission to help students develop purposefully—from first year through life beyond Reed—is a genuine draw. I'd love to bring this methodology to your team.

Sincerely,

Jamie Cheng
